

BuzziBooth

Nowadays we work in open-plan offices, and we try to create a loft feeling at home as well. But this means places where we can make a quick phone call in peace or work by ourselves on our laptops have become rare. designer alain Gilles' solution is the BuzziBooth: a felty 'phone box' made of soundinsulating felt that dampens outside sounds. Now you can have a moment alone even in the noisiest of surroundings. Micro-architecture for maxi spaces!
