Important information

Website

All up to date product information (images, 2d/3d data, maintenance instructions, material options, list of fabrics, and so on) can be found on www.arco.nl.

Standard and tailoring

Standard product dimensions and tailoring options are listed on each fact-sheet. Wishes (specials) beyond this will be evaluated after application and will be granted only under certain conditions. Each fact sheet indicates what the standard sizes of a product are and, if so, within which frameworks tailoring is possible. Versions that fall outside this framework will be assessed after application and only granted if they are part of a large order (> €50,000), or if other weighty interests apply.

Ordering guide

The ordering guide shows the choices that need to be made when ordering a product.

Matrix

If the price matrix does not include a price for a material or size, this version is technically not possible.

Order confirmation

The confirmation will be sent by e-mail within a week after receipt of an order. Should this not be the case, please report this, so that the order will not be delayed.

It is important to check the order confirmation carefully.

In addition to the order confirmation, you will receive a sales drawing of each product ordered with the confirmed dimensions of the furniture. Please note that a tolerance applies to the stated dimensions. This deviation applies to tables, chairs and small furniture.

Order modification/cancellation

It is important to properly carefully check the order confirmation. It is possible to cancel within 7 days (5 working days) after the order has been sent by email to change or cancel the order.

After the expiration of this period the confirmation is binding and changes in the order are no longer possible.

Delivery time

Arco produces on request. Our delivery time can vary and is dependent on the type of order, the capacity and the availability of the required materials.

Planned delivery week

On the order confirmation we mention our planned delivery week. This week is subject to approval of our final quality check.

COM

It is possible to upholster your furniture in COM. This is always upon request and, if necessary, after approval of a fabric sample submitted by you.

It is not possible to upholster your furniture in your own leather.

Orders will be processed after receiving the sended COM on the following address:

Arco Meubelfabriek B.V.
Parallelweg 2-III
NL-7102 DE Winterswijk

On the packaging, your company name with the order number and/or commission name must be clearly stated. Different commissions should not be delivered together in one package.

Veneer table legs

In addition to P- (project) lacquer or N- (natural matt) lacquer, solid wood and duramas can also be finished with oil. Veneer can only be finished with lacquer.

This means that, for tables with a solid wood or duramas top, but a veneer base, you can choose an oil finish for the top but must specify a lacquer finish for the base (this applies specifically to Balance, Essential, HAT, Kami, Spazio and Extend).

Wooden bases for seating

The wooden bases of our seating furniture are only available in N- or P-lacquer finish.

Smoked oak

A smoked oak table top always comes with a 1300 oak black frame. There are two exceptions: Base and Joist. They do come with a smoked oak frame. Duramas smoked oak is not available with an oil finish.

Brushing

Brushing is optional for solid and duramas table tops with a lacquer finish with a maximum width of 128 cm.

Wheels/footcaps

The frames are standard provided with footcaps for both hard floors and carpets. The castors are suitable for all types of flooring.

Sales conditions

All our agreements are subject to the general sales conditions of the Central Union of Furniture manufacturers, registered at the Court of Amsterdam, dated March 16th 2018 under number 9/2018. A copy is available on request.

Small order surcharge

For orders with a net invoice value less than € 750,- we charge € 25,- net.

It is not possible to combine orders afterwards. If you want to save on small order surcharge, you have to submit combined orders yourself.

Materials

Please note that the printed samples only serve as indication of the color.

Wood

Wood is a natural material and no two trees are the same. Each piece of furniture is a natural reflection of the specific wood it is made from and has its own unique wood grain. Therefore, despite our careful selection, there may be variations in texture or colour. Please allow for localised light or dark discolouration, which often only becomes apparent after processing.

It is important for wood to maintain its moisture content. To prevent the wood from 'moving' (shrinking or expanding), we recommend keeping the relative humidity in the room as constant as possible (around 60%). The temperature should also be kept as constant as possible.

Wood discolours under the influence of (sun)light and takes on its final colour after a few months. In the case of extendable tables, the inserts should therefore also be exposed to light during these months. They can then be stored (if they are separate inserts) or retracted (integrated inserts).

As wood discolours when exposed to (sun)light and takes on its final colour after a few months, re-ordered furniture will never have the same colour.

Solid wood (Arco premium quality)

Our solid wooden table tops are composed of solid wooden strips of varying widths which are glued together. The tables can be finished with mat-natural finish (hereafter N-finish), project finish (hereafter P-finish) or with oil. Natural characteristics of the wood such as knots, deformations, black spots etc. are inevitable. With premium quality solid wood, open defects must never be visible, (however, they may for instance be found on the underside of the table top). Solid wood is extremely sensitive to fluctuations in temperature and humidity, which could cause the wood to "work" and create e.g. little cracks in the course of time.

Solid wood (Local Wood)

Local Wood is wood from the region around the Arco factory in Winterswijk. Local Wood does not hide any 'imperfections' in the wood. Knots are often part of the table top and give it its own character. These knots are never open, they are closed.

Duramas (semi-solid wood)

Duramas is composed of a thin layer of premium quality solid wood, which is glued onto the top and bottom of a supporting core panel (e.g. poplar), which provides for an extremely stable sandwich construction. The advantage of Duramas is that high quality wood is sparingly used, while the top layer is still strong enough to be sanded and oiled like solid wood. Duramas is sensitive to fluctuations in temperature and humidity which could cause the wood to "work" and create little cracks in the course of time.

Veneer

Veneer is a thin layer of wood glued onto a core panel. The advantage of veneer is that it is real wood, with the corresponding warm appearance and tactility, but it hardly 'works' (shrinking and expansion). Arco uses a special method where the veneer sheets are mirrored so that the patterns in the wood optically continue, thereby creating an even wood image.

Finishes

Stain colors

Our oak furniture (including solid wood, duramas and veneer) can be stained in different colors. Staining is a technique where the color is applied to the wood while the wood structure remains clearly visible. Stained wood can be finished with N-finish or P-finish. Finishing with oil is not possible.

Smoked oak

Oak contains tannin, the same substance that makes red wine and black tea 'dry'. This substance reacts to the ammonia vapours that are dispersed in the drying chamber during the drying process. Due to this the wood colors "through and through". The tannin concentration determines the color, which may vary from light brown, to a warm deepbrown and sometimes almost black. This concentration is influenced by the soil composition and the living environment of the tree and can therefore differ greatly per trunk and even among different sections of the same trunk. Even though the color is selected during the production process, it is impossible to guarantee that everything will stay in the same color. In other words, color differences always occur in smoked oak.

Furthermore, we would like to inform that the smoked oak we use for our tables is no premium quality solid oak. For that reason natural characteristics such as little knots or black spots, deformations, etc. might be visible. Smoked oak can be finished with N- or P-lacquer and oil (only solid).

Brushed oak (only on solid wood)

Brushing creates a relief between softer and harder growth rings. The depth is influenced by the wood's natural properties: the density, flat or quarter sawn and the structure. There will always be variations in 'depth' and 'coarseness'. The grooves will be deeper in the 'softer' wood parts. Cracks cannot be avoided and will hence remain visible. The table top can become somewhat uneven due to the brushing, thereby creating a risk of splinters. When a product from our Local Wood collection will be brushed, whitish spots, knots, differences in color and all other natural properties of 'Local Wood' will remain visible. Brushed oak can be finished with an N- or P-lacquer.

Oil finish for solid wood and duramas

Oiled solid wooden and duramas tables show the natural radiance of the wood even better than solid wooden tables with N- or P-finish. Tables with an oil finish are somewhat more sensitive to stains and moisture however, and therefore require some maintenance. Arco solid wooden and duramas tables are treated with a high quality oil, which is only made from ecologically responsible materials. The oil nourishes and protects the wood.

Lacquer finishes for veneer, solid wood, duramas and color lacquer

We only use finishings which meet the highest quality standards. You can choose from two different finishes: N- or P-finish. The two different finishes provide excellent protection for the wood.

N-finish gives the wood an unmistakable mat appearance.

P-finish gives the wood a slight gloss. The P-finish is less sensitive to forming stains, and is therefore easier to maintain than N-finish.

Lacquer colors

A wide range of our furniture can be lacquered in various colors, whereby the color is applied on the material. Lacquer colors are not possible for solid wooden and duramas tables.

In addition to the standard P-lacquer finish, N-lacquer is also available for dark colours.

Laminates

HPL Fenix® NTM

Nano technology is used for FENIX® NTM surfaces. The surface is obtained through the next generation of resins, developed by Arpa Industriale. With this technology, FENIX NTM® has access to advanced features such as an extremely mat surface which is soft to touch, protects against fingerprints and provides thermal recovery from minor scratches. This innovative material also has specific properties that facilitate cleaning and no special maintenance is required. FENIX® NTM is resistant to fungus, has improved anti-bacterial properties and is resistant to rubbing, scratching and abrasion.

Forbo Furniture Linoleum

Furniture Linoleum is a bio-based, natural material produced in the Netherlands. Furniture Linoleum does not leave fingerprints, is antistatic and has a pleasant writing surface.

The material is 'alive', develops a patina with use (just like leather) and has a number of associated characteristics. These include small marks, dents or shiny streaks.

Metals

Aluminum

Aluminium is a material that is easy to cast, which means that an aluminium base can be moulded and finished into the desired shape. Aluminium requires little maintenance, it provides a great shape freedom and it is a lightweight material.

Artisanal cast aluminum

For the production of the base of the Joist and Trestle, Arco has chosen for a artisanal cast base (sand casting and Coquille casting). In this production method, aluminum is scooped from a crucible in a molten state and then poured into a mold (made of sand or metal).

Due to the rapid solidification in the mold, a fine-grained structure is formed, similar to the texture of an orange peel. Characteristic of this technique is the presence of small visible holes on the surface. It is also possible for shallow streaks or small bumps to occur on the surface. These characteristics are inherent to this casting process.

Finish: Epoxy fine texture

Epoxy is a thermo-hardening plastic material which adheres to virtually any surface. Epoxy is also abrasion resistant and requires little maintenance. Applying epoxy to metal provides a very durable surface treatment and offers a wide range of colors. We have various epoxy colors available in our collection.

Finish: Mat chrome

Chrome is a resistant surface material that resists scratches well. In case of a base in chrome, a layer of chrome is applied to metal.

Finish: Aluminum

We have aluminium basis available both in brushed and polished versions. Optically, brushed aluminium provides the product with a softer look than polished aluminium.

Concrete

Concrete is composed of the binding agent cement, mixed with water and aggregates such as gravel and sand. By combining the correct amounts, a stone-like and durable material is created which can be shaped as required through a casting process. Concrete has a robust appearance and it is an ideal material for creating a stable table.

Textile

Our seating furniture is available in many fabrics from different manufacturers, but we closely collaborate with Kvadrat (<http://kvadrat.dk>), De Ploeg (www.deploeg.com), Gabriel (www.gabriel.dk/en/) en Camira (www.camirafabrics.com).

For the complete and current fabric list visit www.arco.nl/en/downloads

Leather

Leather groups b and d

Aniline leather is provided with a protective layer, but is not completely covered. With this method of finishing, the natural properties of the leather are retained as much as possible. In use, the leather will obtain its own character, which is mainly determined by the typical gloss (patina) that leather obtains after a period of time.

Semi-aniline and dyed leather

These types of leather are not only colored, but they also have a topcoat that partially covers the natural properties. This type of finishing creates a user-friendly surface.

For the current leather collection visit our website: www.arco.nl/en/downloads

There may be slight colour variations from sample to sample and product to product. Furniture linoleum has certain characteristics that customers should be aware of. Arco cannot be held responsible for these inherent material characteristics. Therefore, Arco cannot accept any complaints in this respect.

Er kunnen lichte kleurvariaties zijn van monster tot monster en van product tot product. Furniture Linoleum heeft bepaalde kenmerken waarvan klanten zich bewust moeten zijn. Arco kan niet verantwoordelijk worden gehouden voor deze intrinsieke materiaal kenmerken. Klachten die hierop betrekking hebben kan Arco derhalve niet accepteren.

Von Muster zu Muster und von Produkt zu Produkt sind leichte Farbabweichungen möglich. Furniture Linoleum verfügt über bestimmte Merkmale, über die der Kunde informiert sein sollte. Arco übernimmt keine Verantwortung für diese Materialeigenschaften und diesbezügliche Beschwerden.

leather

Our seating furniture is available in our own leather collection. We also work with the following collections from Ohmann (www.ohmannleather.com) 1012 (leather group C), 1010 (leather group D) and for the Close, Laze and Re-volve also with Elmosoft (leather group D). Ohmann leather is possible with the purchase of at least 4 chairs or 1 bench in the same version.

Onze stoelen en banken zijn leverbaar in onze eigen leercollectie, maar wij werken ook met de volgende collecties van Ohmann (www.ohmannleather.com) 1012 (leergroep C), 1010 (leergroep D) en voor de Close, Laze en Re-volve ook met Elmosoft (leergroep D). Ohmann leer kan bij afname van tenminste 4 stoelen/1 bank) in dezelfde uitvoering.

Unsere Sitzmöbel sind in unserer eigenen Lederkollektion lieferbar. Wir arbeiten auch mit den folgenden Kollektionen von Ohmann (www.ohmannleather.com) 1012 (Ledergruppe C), 1010 (Ledergruppe D) und bei Close, Laze und Re-volve auch mit Elmosoft (Ledergruppe D). Ohmann-Leder ist möglich bei einer Bestellung von mindestens 4 Stühlen oder 1 Bank in der gleichen Ausführung.

textile

Our seating furniture is available in many fabrics from different manufacturers. Among others, we work with with Kvadrat (<http://kvadrat.dk>), De Ploeg (www.deploeg.com), Gabriel (www.gabriel.dk/en/) en Camira (www.camirafabrics.com). The fabric group classification can be found in the fabric list at www.arco.com/downloads

Onze stoelen en banken zijn leverbaar in vele stoffen van verschillende fabrikanten. Wij werken onder andere met Kvadrat (<http://kvadrat.dk>), De Ploeg (www.deploeg.com), Gabriel (www.gabriel.dk/en/) en Camira (www.camirafabrics.com). Die Klassifizierung der Stoffgruppen finden Sie in der Stoffliste auf www.arco.nl/downloads

Maintenance instructions & Warranty

General

Before using, we recommend you to clean your furniture with a damp cloth (for example with ZO Alles Schoon from the maintenance kit delivered with the table) to remove any remaining dust residues. It is recommended to also clean the underside of the legs. Make sure that the carpet is completely dry before placing the furniture on a cleaned carpet.

Hard (scratches!), hot (shrinkage!) or wet (stains!) objects must never be placed directly on the table, as it could cause irremovable damage. It is therefore recommended to always use coasters.

Some of our products have removable parts; should there arise some space in the joints as a result of dryness or use, simply tighten the bolts and screws of the construction.

We also like to point out to you again the fact that wood is a natural material. For example, the final colour of the wood develops under the influence of (sun)light during use (ask your dealer for explanation and advice). For an equal colouring, it is advisable to also place the extra leaves in the same light during the first months. Very important for the condition of the wood is to maintain the humidity of the air as constant as possible (approx. 60%) in order to avoid drying out of the wood (shrinkage!).

Wood

Wood (veneer, solid, duramas) with P-lacquer and furniture with colour lacquer

Daily cleaning with a cotton cloth. Remove stains with a damp cloth or with ZO Alles Schoon from maintenance kit delivered with the table. More persistent stains can be removed using ZO Keuken Schoon. This is degreasing kitchen cleaner which can be ordered on www.zoschoon.nl.

When the cleaning agent can soak for a while you will get the best result. You can spray in the table and wipe away with the delivered cloth. Always clean the table thoroughly with clean water to remove the detergent used (however, do not over-wet the surface). Finally, dry the table top thoroughly. Always work in the direction of the grain. Never use wax, wax-containing substances or abrasive agents.

Wood (veneer, solid, duramas) with mat-natural finish (N-finish)

Daily cleaning with a cotton cloth. Important: N-finish is more sensitive to grease than P-finish. This finish therefore requires a little more attention as to daily maintenance. Remove grease stains immediately with a moist cloth or with ZO Alles Schoon from the delivered maintenance kit delivered with the table. More persistent stains can be removed using ZO Keuken Schoon. This is a degreasing kitchen cleaner which can be ordered on www.zoschoon.nl.

When the cleaning agent can soak for a while you will get the best result. You can spray in the table and wipe away with the delivered cloth. Always clean the table thoroughly with clean water to remove the detergent used (however, do not over-wet the surface). Finally, dry the table top thoroughly.

Important: liquids spilled on the surface should be cleaned up immediately or within 5 to 10 minutes at most! Pollen (e.g. from flowers) must be carefully removed using adhesive tape. Never rub the pollen! Pollen and stains of marker pens cannot be removed. We also wish to draw attention to the presence of plastic protective caps under certain items (e.g. lamps, bowls, phones, laptops) as some pigments in the rubber could cause spots in the mat-natural lacquer. These stains cannot be removed afterwards. To prevent this, always put felt under the rubber feet.

Laminates

Solid wood and duramas with a transparent oil finish

For daily maintenance it is sufficient to clean the table with a dry cloth or lukewarm water if necessary. We recommend removing spilt liquids immediately. Treat the table regularly with oil (twice a year on average) in order to preserve the warm, natural glow of the wood and to provide the wood with the best possible protection against the effects of substances such as liquids. We supply a special maintenance kit together with an oiled table, including a bottle of oil (apply a thin layer of oil on a clean, dry table, distribute well and polish with a dry cloth). You can also use a good quality teak oil (see the packaging or product documentation for instructions). Treat your table regularly with oil to provide the wood with proper care and protection, thereby promoting the longevity of your table. You can easily remove light scratches and stains yourself. The special maintenance kit also contains a ball of steel wool to lightly sand the table top. It is important to sand the entire table top (not only the location of the stain or scratch), and always work in the direction of the grain. After sanding, treat the table with oil or teak oil. Avoid using caustic or abrasive cleaning agents.

Solid wood and duramas with a white oil finish

For daily maintenance it is sufficient to clean the table with a dry cloth or lukewarm water if necessary. We recommend removing spilt liquids immediately. To protect the wood against scratches and the influence of substances such as liquids, the table should be treated a few times a year with white oil. A bottle of white oil is provided for this purpose. Apply a thin layer of oil, using a clean, lint-free cloth and allow it to soak for a few minutes. Use a clean cloth to wipe it away. Always try first on an unnoted area.

NB: Do not sand the table top.

Smoked oak

See maintenance for solid wood and duramas with the respective finish (N-, P-lacquer or oil (only solid)).

Brushed oak

See maintenance for solid wood and duramas with the respective lacquer finish (N- or P-lacquer). However, dirt and moisture can remain in the 'seams/grooves', which can work their way into the wood. It is therefore advisable to quickly remove moisture and dirt.

HPL Fenix NTM®

For daily maintenance it is sufficient to clean the surface with a damp cloth with warm water and mild detergent when necessary. We recommend using acetone for persistent dirt. Superficial scratches can be polished away by friction using a sponge. The warmth generated by rubbing closes the molecules, causing the scratches to disappear.

Forbo Furniture Linoleum

For daily maintenance, we recommend wiping the surface with a damp cloth using warm water. If necessary, use a mild detergent (ZO Schoon or a pH neutral soap). Always rinse thoroughly with clean water to remove any detergent used. Allow the surface to dry thoroughly.

Important: Immediately remove any spillages (including ink, coffee, tea, red wine). Prevent stubborn stains (rings) and scratches from sharp objects; use coasters with a soft underside for cups, glasses, vases, etc.

Metal

Finish: epoxy fine texture

Keep clean with a soft, lint-free, dry cloth and mild soapy water.

Finish: Chrome/stainless steel/stainless steel optic

It is sufficient to rub with a soft, dry cloth or to clean with mild soapy water. Moisten lightly with methylated spirit if necessary. Rub with acidfree vaseline once a year.

Finish: Casted aluminium

See chrome/stainless steel/stainless steel optic. Superficial scratches on a casted aluminium base can be removed with soapy water and Scotch Brite. Always work in the polishing direction.

Concrete

For maintenance instructions for concrete, see 'wood (veneer, solid, duramas) and color lacquer with P-finish'.

Textile

Keep the chair or sofa dust free by using a soft brush or vacuum cleaner (with a soft brush tip). Use a foaming agent to clean the furniture. It is difficult to provide instructions for removing stains in a nutshell, as it varies by type of stain and material. For treating stains, please see <http://www.james.eu/en/stain-removal>. The following applies for all agents: first try carefully on a spot that is not directly visible. Never use too excessive amounts of agents to prevent discoloration and to prevent damage to the foam layer.

Leather

Aniline leather (Leathers in group B and D)

For maintenance of this type of leather, regularly wipe down with a soft dry cloth. Aniline leather should be treated once a year with a leather protective agent for full-aniline leather. Please note! In the case of spills, dab the liquid immediately (do not rub). See www.ohmannleather.com for leather maintenance products.

Semi-aniline and dyed leather

For maintenance of this type of leather, regularly wipe down with a soft dry cloth, a soft brush or a moist cloth if necessary. It is recommended to treat this leather twice a year with a leather nourishing agent. See www.ohmannleather.com for leather maintenance products.

Warranty

Every piece of Arco furniture is produced from especially high quality materials and manufactured with the greatest care. The furniture only leaves our factory after careful quality control. If, despite of this, component or manufacturing faults occur, Arco will cover the cost of replacement or repair according to the following schedule:

Years of use contribution from Arco (in percentage of costs):

0-1	100 %
1-2	80 %
2-3	60 %
3-4	40 %
4-5	20 %

As condition we give that our maintenance advice has been used correctly. Furthermore, we are talking about normal, domestic use. Defects which are a result of injudicious use are excluded from warranty.

We also like to point out to you again the fact that wood is a natural material. For example, the final colour of the wood develops under the influence of light during use (ask you dealer for explanation and advice). For an equal colouring, it is advisable to also place the extra leaves in the same light during the first months. Very important for the condition of the wood is to maintain the humidity of the air as constant as possible (approx. 60%) in order to avoid drying out of the wood (shrinkage!).

A warranty claim to Arco has to be made within the warranty period, which starts on the day of delivery to the first owner or at the latest 30 days after delivery from Arco to the Arco dealer. Submitting a claim has to be done by presenting the invoice and the warranty certificate.

Specific exclusions

1. Normal wear and tear and damage are not covered by the warranty.
2. Damage due to incorrect use or wrong maintenance are excluded from warranty.
3. Indirect damage due to a possible defect, such as loss of profits, etc., are also excluded from warranty.
4. Repairs to the furniture and/or upholstery without written permission from Arco, are not covered by the warranty.
5. Chairs: the Arco warranty conditions do not apply for leather and fabric upholstery which are not from the standard Arco collection (e.g. customer own materials).

5 **Additional information**

The Move 2 is equipped with castors with brakes and comes with invisible magnets for easy configuration

The Move triangular 1 and Move triangular 2 are stackable. It is possible to stack these tables up to a maximum of six pieces

Depending on the configuration of the Move table, multiple legs can converge in one place. Furthermore, we cannot guarantee that every leg is 100% perpendicular. Small deviations are part of any handcrafted product. For this reason, each leg turns slightly inward. The flatness (or otherwise) of the floor may also play a role in perceived deviations

Aanvullende informatie

De Move 2 is voorzien van wielen met rem en wordt geleverd met onzichtbare magneten voor eenvoudige configuratie

De Move triangular 1 en Move triangular 2 zijn stapelbaar. Het is mogelijk deze tafels te stapelen tot een maximum van zes stuks

Bij de Move tafel komen afhankelijk van de configuratie veel poten bij elkaar op één plek. Wij kunnen niet garanderen dat alle poten van de Move tafels altijd 100% haaks staan. Kleine toleranties zijn onderdeel van het product. Om die reden is de positie van de poot iets naar binnen gezet. Tevens worden de tafels op verschillende manier gecombineerd waardoor eventuele verschillen elkaar de ene keer opheffen en de andere keer juist kunnen vergroten. De vlakheid van vloer speelt hierin ook een rol

Weitere Informationen

Der Move 2 ist mit bremsbaren Rollen ausgestattet und wird mit unsichtbaren Magneten für eine einfache Konfiguration geliefert

Der Move triangular 1 en Move triangular 2 sind stapelbar. Es ist möglich, diese Tische bis zu sechs zu stapeln

Je nach Konfiguration des Move-Tisches können mehrere Beine an einer Stelle zusammenkommen. Wir können auch nicht garantieren, dass jedes Bein zu 100 Prozent senkrecht steht. Kleine Abweichungen gehören zu jedem handgefertigten Produkt. Aus diesem Grund ist jedes Bein leicht nach innen gedreht. Auch die (Un-)Ebenheit des Bodens kann zur Wahrnehmung von Abweichungen beitragen

1 Cut outs (CM18/19/20)

we can offer (tailored) cut outs for cable management solutions outside Arco's collection

we can only accept an order with cut out if we receive a drawing with the dimensions and desired position along with the order confirmation, we will send our drawing with the dimensions for checking and approval of the cut out

2 Standard

CM18 (for all tables except Slim(+) family)

circle

rectangular

square

CM19 (for Slim(+) family)

circle

rectangular

square

(max. cut out dimension: 560mmx110mm)

CM20 (for all tables except Slim(+) family)

cut out for built-in modules from e.g. Bachmann (possibly also with extra mounting holes)

Ausführungen

-

5 Additional information

For non-solid tables, the inner core and unfinished edges will become visible. We recommend taking this into account in the design, for instance by applying an 3mm cover edge.

Splintering as a result of the cut out may not be a reason for rejection of the table.

For CM20, please note:
built-in modules must be installed and connected on site by a qualified electrician

Aanvullende informatie

Bij niet-massieve tafels worden de binnenkern en onafgewerkte randen zichtbaar. Wij raden aan om hier in het ontwerp rekening mee te houden door bijvoorbeeld een kraag van 3 mm aan te brengen. Splinters als gevolg van de uitsnede mogen geen reden zijn voor afkeuring van de tafel.

Voor CM20, let op:
ingebouwde modules moeten ter plaatse worden geïnstalleerd en aangesloten door een gekwalificeerde elektricien

Weitere Informationen

Bei Tischen, die nicht aus Massivholz bestehen, werden der Kern und die unbearbeiteten Kanten sichtbar. Dies sollte beim Entwurf berücksichtigt werden, z. B. durch das Anbringen eines 3 mm breiten Rahmens. Splitter, die beim Ausschchnitt entstehen, sind kein Grund zur Reklamation des Tisches.

Zu beachten bei CM20:
Einbaumodule müssen vor Ort von einer Elektrofachkraft installiert und angeschlossen werden.

we create comfort

Information

Most Arco chairs are available in a large number of fabric and leather types. Almost all Kvadrat, Febrik and De Ploeg fabrics are suitable for our chairs (with the exception of Home-Work and Side by Side).

The price classification of frequently used fabrics and the Arco leather collection can be found in our fabric list. This can be found on our website.

If the fabric you have chosen is not listed, please contact our sales department. In connection with the processability of the fabric, you may be

asked to send a sample to determine whether or not a fabric is suitable.

Orders for which you send the fabric yourself will not be processed and confirmed until we have received the fabric.

For leather, in addition to the Arco leather collection, a choice can be made from the Ohmann 1012 and 1010 collection. For these qualities, a minimum purchase quantity of 4 chairs in the same version then applies.

See www.arco.nl for the current fabric list.

1 Home-Work

Jonathan Prestwich

2023

2 Standard

3 Materials

Seat and back: fabric
Frame: oak (solid)

Materialen

Zitting en rugleuning: stof
Onderstel: eiken (massief)

Materialien

Sitz und Rücken: Stoff
Untergestell: Eiche (Massiv)

4 Finishes

All Arco colors and only N- or P-lacquer finishes for the mentioned materials

Afwerkingen

Alle Arco kleuren en alleen N- of P-lak voor de genoemde materialen

Ausführungen

Alle Arco Farben und nur N- oder P-lack Ausführungen für die genannte Materialien

5 Additional information

The Home-Work's cover can be replaced at the end of its lifespan. For this reason the upholstery requires more consistency to ensure that the cover fits with absolute precision. As a result we're only able to offer a limited number of fabrics. See point 3 on the price page.

Aanvullende informatie

De bekleding van de Home-Work kan aan het einde van de levensduur worden vervangen. Daarom vereist deze meer stevigheid, om ervoor te zorgen dat de hoes precies past. Als gevolg daarvan is een beperkt aantal stoffen mogelijk. Zie punt 3 op de prijspagina.

Weitere Informationen

Der Bezug von des Home-Work kann am Ende seiner Lebensdauer erneut werden. Damit der Bezug passgenau sitzt, muss die Polsterung eine stabilere Konsistenz haben, und es kommt nur eine begrenzte Anzahl von Stoffen in Frage. Weitere Informationen siehe Punkt 3 auf der Preisseite.
